☐	Describe the issue:

Steps Taken to Resolve:

1. EViD was not communicating to our office and replaced.

2. Additionally there was a "bug" introduced during the software update between the Primary and General. Sometimes when attempting to reprint

a ballot on the EViD compact, the print spooler would enter into an errant condition, the ballot would not print and the EViD was non responsive.

The solution was to power cycle the EViD. This occurred intermittently throughout most all of the precincts. VR Systems is aware of the situation.
